

# **NECAP Test Interpretation Workshops, CCSS Implementation, and SBAC Assessments**

The NECAP workshop will cover the release of the fall 2011 NECAP results and use of NARS to review student level results. In addition, this workshop will include updates regarding implementation of the Common Core State Standards in NH. CCSS resources will be shared. Common messages will be presented that can be used with all stakeholders from staff to community members. Guidelines for implementation will be available. Finally, developing information about the new SBAC assessments will be shared together with the transition plan from NECAP to the SMARTER Balanced summative assessment for CCSS. This is an opportunity for school/district leadership teams to obtain resources and guidance in moving forward with CCSS.
